

Revised 3/2008

\*Recommend crimping the case mouth into the front cannelure groove.

\*CIP specs for this cartridge call for a bore diameter of 0.400" and a groove diameter of 0.410".

\*Many older .450/400 rifles have varying bore and groove diameters. Barnes' loading data is recommended only for modern firearms in good condition that are built to current specs. If in doubt, have a competent gunsmith evaluate the firearm before using these loads.

◆ Indicates most accurate loads

### .450/400 Nitro Express 3"

**Bullet Weight:** 400 gr

**Case Trim Length:** 2.990"

**S.D.** 0.340

**Bullet Style:** Banded Solid
