BARNES BULLETS | PRODUCT CATALOG

**BARNES®**

**UTAH'S HOME. ALWAYS WILL BE.**

**UTAH PROUD & WORLD RENOWNED.**

Utah isn't just home. It's America's epicenter of ballistic science and home to the most obsessed, dedicated, and passionate group of ammunition engineers and craftsmen on the planet. Avid shooters and hunters who use what they build – honing the most accurate, most effective bullets, components and ammunition the world has ever seen. Forged here in Mona, Utah, our advancements have taken the world by storm, bringing the pinnacle of our ballistic innovation to the doorsteps of hunters worldwide.

## KNOCKDOWN PACK-OUT CHAMPION OF THE WEST.

THE WORLD'S MOST PROVEN ALL-COPPER HUNTING BULLET.

Western big game hunts will challenge even the most seasoned hunter. We know because these are our stomping grounds. From traversing steep timber canyons and bugling in bull elk in heavy timber, to taking cross-canyon shots and stalking pronghorn across open plains, these hunts demand peak performance from you and your gear. That's why we make bullets purpose-built for the challenges of a western hunt. With higher weight retention and double diameter expansion, our bullets deliver terminal results at any range and any species, so when the moment of truth arrives, you'll have everything you need to tag out.

The most technologically advanced ammunition on the planet made by the most dedicated western hunters on the planet.

**HUNTING****VOR-TX® LR RIFLE**

- 16** Loaded with premium all-copper Barnes LRX bullets and designed for deadly precision at long range.

**VOR-TX® RIFLE**

- 18** Handloaded precision in a factory round super-engineered to stop big game in its tracks.

**NEW  
VOR-TX RR®**

- 20** VOR-TX RR loads are optimized for reduced felt recoil; featuring TTSX bullets that deliver maximum expansion, penetration and terminal performance out to 300 yards.

**VOR-TX® SAFARI**

- 22** The destructive power of TSX bullets and the virtually indestructible, straight-tracking, deep-penetrating Banded Solids.

**VOR-TX® EXPANDER SHOTSHELL**

- 23** Polymer-tipped, all-copper slugs that deliver the high velocity, flat trajectory, and unmatched accuracy you need for deer-dropping performance.

**VOR-TX® HANDGUN**

- 23** The XPB bullets deliver deep penetration and double-diameter expansion in popular calibers.

**PIONEER**

- 25** Designed specifically for lever-action rifles and revolvers, Barnes Pioneer ammunition delivers maximum terminal performance, massive expansion, and deep penetration downrange.

**TSX / TTSX / LRX**

- 26** Proven to be the most accurate and lethal hunting bullets available at any ethical distance.

**MUZZLELOADER**

- 27** Extreme muzzleloader precision, with awesome expansion, high weight retention and deep penetration.

**VARMINT GRENADE**

- 41** These loads feature bullets with a copper-tin powdered core that delivers explosive results. Varmint Grenade bullets rarely exit large predators, while leaving valuable pelts virtually intact.

**VARMIN-A-TOR**

- 41** Unleashing the power to vaporize any varmint or predator with Varmin-a-tor. This hollow-point, lead core bullet with scored nose cavity and thin tapered jacket fragments violently on impact.

**PERSONAL DEFENSE****TAC-XPD**

- 30** Large, deep hollow-point cavity bullets designed for top performance when it's most critical.

**TAC-XP PISTOL**

- 31** The all-copper construction and very large, deep hollow-point cavity expand, penetrate and perform more consistently than any personal defense product on the market.

**DEFENSE BUCKSHOT**

- 31** The terminal punch and dense consistent patterns you need when it matters most.

**MATCH RANGE TARGET****PRECISION MATCH**

- 34** For shooters who demand uncompromising performance and exceptionally accurate, long-range results.

**MATCH BURNERS**

- 35** Premium match-grade bullets for competitive and target shooting at extreme distances.

**BARNES AMMUNITION-MULTI-PURPOSE****MPG**

- 40** Barnes MPG gives you all of the benefits of a frangible bullet, while withstanding the rigors of handling, feeding and firing in high-capacity magazines.

# THE BARNES X BULLET

PIONEERING THE WORLD'S MOST  
**PROVEN ALL-COPPER  
HUNTING BULLET.**

For more than 30 years since its introduction, the all-copper Barnes X Bullet has remained the first choice of serious big-game hunters. Its specially engineered razor-sharp petals produce massive wound channels even in dense, thick-skinned game. With deeper penetration, near 2X expansion and higher weight retention than virtually any other projectile on the market today. Ballistic innovation that continues to evolve over five X Bullet generations – all adding up to ammunition worthy of the most dangerous African big game, and the next deer season.

**1989**  
X BULLET

**1997**  
XLC

**2003**  
TSX

**2008**  
TTSX

**2011**  
LRX

The XLC Bullet featured a dry film lubricating coating designed to decrease fouling and improve velocity and accuracy. Introduced in 2003, the TSX Bullet incorporated horizontal grooves along the circumference of the bullet, which eliminated the need for a dry lubricating film. These grooves also provided a place for copper displaced by the rifling to resettle.

The Barnes TTSX added a blue polymer tip to the proven X Bullet equation. This tip raised the ballistic coefficient for improved flight characteristics and acted as a wedge to promote full expansion and energy transfer.

In 2011, Barnes introduced the LRX Bullet, designed for consistent terminal results at close and long range, with a bullet shape and design optimized for maximum ballistic coefficient.

**COMPETITIVE ANALYSIS  
PERFORMED WITH  
180 GRAIN BULLETS  
FIRED FROM A 300  
WIN MAG AT 300-YARD

Barnes all-copper TSX

Leading competitor's jacketed lead-core hunting bullet

VOR-TX® 35 Whelen 180 GR Tipped TSX,  
recovered from a hog

**THE BULLET IS THE LEAST  
EXPENSIVE PART OF THE HUNT.  
DON'T COMPROMISE.**

Barnes all-copper bullets expand rapidly, dump more energy and penetrate deeper than any lead-core bullet available. The Barnes all-copper bullets expand into four, five or six cutting petals that tear through tissue, bone and vital organs allowing for deeper penetration and maximum terminal performance.

WESTERN HUNT EXPERIENCE 2021

## LOADED WITH DECades OF ON-GAME EXPERIENCE.

At Barnes, constant innovation leads to ballistic perfection. Since 1991, we've employed aerospace technical abilities in our manufacturing process. And today, we're taking accuracy and on-game effectiveness to new levels with VOR-TX® LR. It's optimized to deliver stunning performance at close and extended ranges. As pioneers of all-copper hunting bullet technology, we are driven to achieve an unrivaled combination of precision and devastating terminal results. A reputation born of extensive testing and countless hunts. Proudly creating the most technologically advanced hunting bullets and ammunition on the planet.

# HUNTING

## A HARD-EARNED HUNT

**BRITISH COLUMBIA IS HOME TO SOME OF THE FINEST WILDERNESS ELK HUNTING IN NORTH AMERICA—AND THE MOST DIFFICULT.**

Deep in the heart of the Canadian Rockies is a pristine paradise, virtually untouched and abundant in wild game. But trekking across this steep, mountainous terrain with its unpredictable weather can bring even the most seasoned hunter to their knees. A hunt of this caliber requires physical endurance, mental fortitude, and the desire to take down a true fair-chase trophy on public land.

We asked our Director of Marketing and Product Management, Mike Painter, and Outdoor Life's gear editor, Scott Einsmann, if they were up for the challenge of a lifetime—they said yes. So we gave them one month to prepare before sending them on a ten-day elk, bear, and mountain goat hunt in B.C. with Compass Mountain Outfitters.

The first day of the hunt began with a grueling 1.5-mile hike up a 60-degree slope littered with deadfall. They had to side-hill their way across steep shale walls and skip across wet rocks in the freezing rain. During the hike in, they encountered a few elk herds, but the bulls kept their distance and their cover.

Scott and Mike didn't know it at the time, but the first day of their hunt would set the stage for the rest of their trip—covering nearly 42 miles on foot through roadless backcountry with herd bulls outsmarting them at every turn. They spent the next three days at a grueling uphill march in the pouring rain, stopping only to eat, sleep, or glass for game.

It wasn't until the fifth day that their guide spotted two legal bulls in a steep clearing surrounded by heavy timber and deadfall. The only access was a steep creek bed that ran down the face of the mountain. It was clear the stalk wouldn't be easy, but bagging the trophy of a lifetime rarely is.

To get within range, they knew they needed to move quickly. Everyone grabbed their gear and hoofed it 3.5 miles to the base of the hill. Once they reached the creek bed, they stopped and took in the 70 feet of vertical shale wall between them and their elk. Then they began to climb.

The sides of the creek bed were slick with ice, making it difficult to take a step without falling back down the hill. As they climbed higher, the creek bed narrowed and the footing became increasingly unstable, causing them to fall back into the creek several times.

Before reaching the top, their guide spotted two grizzly bears on the outskirts of the clearing near the elk. The hunters were within 100 yards of two legal bulls with only one last scramble to reach the top—there was no way those bears would stop them now.

As they stepped over the top of the wall, a bugle ripped through the air. Once they caught their breath, they loaded their rifles and moved into position. The first bull stepped out only 20 yards in front of Scott. He squeezed the trigger of his .300 Win.

Mag. Tikka and a 180-grain Barnes VOR-TX® sent the bull hurling down the hill. He got in a well-placed follow-up shot right before the bull disappeared into the thick vegetation.

Mike took off in pursuit of the second legal bull, following him through a patch of pine trees. Within moments, Mike fired an off-hand shot from his 300 PRC Fierce Edge at 75 yards. His 208-grain Barnes LRX slammed through the bull's shoulder and dropped him in his tracks.

After five backbreaking days of hard hunting, Mike and Scott each took down a massive 6x6 bull within minutes of each other. They celebrated, congratulated, and enjoyed their hard-earned success, but the moment didn't last long. They all knew they had the pack out from hell ahead of them, and with the grizzlies nearby, they didn't want to leave anything behind. Instead, they decided to pack out both bulls in one painful trip.

With their packs loaded to the brim and elk antlers across their shoulders, they began their slow, treacherous hike out. As hard as it was, they kept moving forward. Before heading back home, Scott was fortunate enough to also tag out on a beautiful black bear.

From the pursuit to the pack out, every experienced hunter knows that hikes in elk country shouldn't be measured by distance but by effort, and the harder your hunt, the sweeter your success.

# VOR-TX® LR

## HUNTING AMMUNITION

**SURGICAL PRECISION AND  
UNMATCHED TERMINAL  
PERFORMANCE AT EVERY DISTANCE.**

### VOR-TX® LR AMMUNITION

Target bullets with high ballistic coefficients can't be trusted to take down big-game animals quickly and humanely. VOR-TX® LR ammunition is loaded with premium all-copper Barnes LRX bullets specially designed not only for precision at long range but unrivaled on-game effectiveness at every range. So whether your trophy presents at close or extreme distance, you can rely on devastating terminal performance from the purpose-built LRX bullet.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 41.

#### NOW AVAILABLE IN:

**300 PRC 208GR LRX BT**

**280 ACKLEY IMPROVED 152GR LRX BT**

MORE VOR-TX® LR INFO @ [BARNESBULLETS.COM](http://BARNESBULLETS.COM)

### THE ETHICAL SOLUTION TO LONG-RANGE HUNTING

As hunters, we strive to be worthy of our hunting tradition. The bullet delivers your intentions to the target, but all bullets are not designed equal.

**LRX BULLETS ARE DESIGNED  
TO MATCH THE LATEST  
ADVANCEMENTS IN FIREARMS  
AND EXTENDED RANGE  
OPTICS CAPABILITIES.**

Doppler radar technology was utilized in the development process to optimize the bullet's profile for low drag and top accuracy at extreme distances. Its long-range precision previously available only to handloaders - loaded and ready for your hunt today.

### LONG-RANGE PERFORMANCE: IT'S ALL ABOUT THE BULLET.

The all-copper LRX (Long Range X Bullet) opens instantly on impact into four razor-sharp petals that plow a wide wound channel and deposit massive amounts of energy throughout the entire length of the cavity. High weight retention sustains bullet momentum for maximum destruction of tissue, bone and vital organs to effectively and humanely take down game at close and extreme distances.

- Polymer tip boosts ballistic coefficient and helps initiate rapid expansion
- Specially engineered scored nose cavity expands into four razor-sharp petals and a large frontal diameter for maximum energy transfer and deep penetration on game at close and extreme distances
- Accu-Groove technology for minimal fouling and superior accuracy
- Boattail design with precision heel radius

# VOR-TX®

HUNTING AMMUNITION

THE PRECISION OF A HANDLOAD.  
**THE TERMINAL RESULTS  
ONLY BARNES CAN DELIVER.**

VOR-TX® Ammunition delivers handloaded precision in a factory round super-engineered to stop big game in its tracks. Expect complete penetration from our all-copper bullet technology with virtually 100% weight retention and double-diameter expansion. It's a flawless confluence of bullet integrity and predictable, bone-busting chaos that puts animals on the ground like nothing else. They're the deadliest and most accurate hunting loads on the planet.

#### VOR-TX® RIFLE

The whirling, destructive power of the Barnes all-copper bullets offer double-diameter expansion, maximum weight retention and excellent accuracy. These bullets provide maximum tissue and bone destruction, pass-through penetration and devastating energy transfer. Loaded with TSX, Tipped TSX and TSX FN bullets.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 41.

#### NOW AVAILABLE IN:

**224 VALKYRIE, 77GR LRX BT,  
6.5 PRC 130GR TSX BT**

#### VOR-TX® 300 AAC BLACKOUT

Profile ensures flawless magazine-length loading in AR rifles. An excellent choice for whitetail, hogs and defense initiatives.

Available in 110 GR TAC-TX FB and 120 GR TAC-TX BT in VOR-TX® Ammunition and reloading components, Barnes legitimized the 300 AAC Blackout as an extremely lethal medium- and large-game hunting cartridge. Engineered exclusively for the 300 AAC Blackout, the competition doesn't hold a candle to the accuracy, terminal performance and wide range of workability the Barnes TAC-TX delivers in this cartridge.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 41.

BARNES VOR-TX®  
110 GR TAC-TX

# VOR-TX® RR

HUNTING AMMUNITION

## MAXIMUM TERMINAL PERFORMANCE, **REDUCED RECOIL.**

### VOR-TX® RR

It's the same massive expansion, deep penetration and devastating on-game results you've come to expect from Barnes all-copper bullets, now available in reduced recoil loads. This all-new line of ammunition features our legendary X-bullet optimized specifically for VOR-TX RR and its muzzle velocity range. Designed for young hunters and anyone who prefers lighter recoil, Barnes VOR-TX RR delivers all of the benefits of the world's most effective all-copper hunting bullet with maximum expansion, penetration and terminal performance out to 300 yards. It's 100% of the confidence you need, and less of the felt recoil you don't.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 48.

These reduced recoil loads feature lighter bullets with modest muzzle velocities, and modern propellants which work together to provide less felt recoil when a full payload round is not desired or necessary. In reduced recoil, as in all loads, Barnes copper, non-toxic X-bullets expand into four cutting petals that tear through tissue and give ideal terminal performance for good, clean kills.

MORE VOR-TX® RR INFO @ BARNESBULLETS.COM

## HUNTING AMMUNITION

VOR-TX® Ammunition delivers hand-loaded precision in a factory round super-engineered to stop game in its tracks. Expect complete penetration from our all-copper bullet technology with virtually 100% weight retention and double-diameter expansion to put animals down like nothing else.

### VOR-TX® SAFARI

The destructive power of TSX bullets and the virtually indestructible, straight-tracking, deep-penetrating Banded Solids.

**SOLIDS AVAILABLE AGAIN IN:**  
**375 H&H, 458 WIN AND 458 LOTT**

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 42.

### VOR-TX® EXPANDER SHOTSHELL

VOR-TX® Expander Shotgun slugs deliver rifle-like performance with Barnes proven on-game results engineered in. Its polymer-tipped, all-copper body produce awesome expansion, high weight retention and deep penetration – a trifecta of deer-dropping performance. With higher velocity, flatter trajectory and unmatched accuracy. Available in both 12 and 20 gauge, in 2½" and 3".

#### AVAILABLE IN:

- EXPANDER TIPPED, 12 GAUGE 437 GR 2¾", #20733**
- EXPANDER TIPPED, 12 GAUGE 437 GR 3", #20737**
- EXPANDER TIPPED, 20 GAUGE 250 GR 2¾", #20735**
- EXPANDER TIPPED, 20 GAUGE 250 GR 3", #20739**

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 43.

### VOR-TX® HANDGUN

The XPB bullets deliver deep penetration and double diameter expansion for maximum weight retention and DRT performance.

**NOW AVAILABLE IN:**  
**9MM, 40 S&W, 45 ACP**

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 43.

## PUTTING THE ACTION BACK INTO LEVER-ACTION AMMO.

### PIONEER AMMUNITION

Barnes Pioneer is the ultimate all-copper lever gun and revolver ammunition, delivering lightning-fast follow-ups and superior on-game performance you can trust.

Whether you choose all-copper Barnes TSX®, or our heavy for caliber jacketed lead-core Barnes Original bullet, Barnes Pioneer™ is powerful medicine for big game, perfected for lever guns and revolvers. Delivering the massive expansion, penetration, and weight retention that built the Barnes reputation

[SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 42](#)

**NOW AVAILABLE IN:**  
**44 REM MAG 225GR XPB**  
**44 REM MAG**  
**300GR ORIGINAL FN**

# LEVER GUN & REVOLVER AMMUNITION **PIONEER™**

### CARRY ON THE LEVER-ACTION LEGACY

Bring your lever gun out of retirement—it's time to experience the superior on-game performance of Barnes Pioneer ammunition. Designed specifically for lever guns and revolvers, this ammo is carefully loaded for terminal performance and delivers massive expansion and weight retention for deeper penetration. Each round is engineered for flawless feeding and cycling from tubular magazine to chamber for lightning-fast follow-up shots.

## A REPUTATION FORGED FROM **SOLID COPPER** AND EPIC KNOCKDOWNS.

The TSX, TTSX and LRX bullets have proven to be the most accurate and lethal hunting bullets available – a fact countless shooters have confirmed time and time again.

### TSX

The deadly effectiveness of the original Barnes X Bullet with:

- All-copper construction
- Sleek profile and precision heel radius in FB and BT designs
- Accu-Groove technology for decreased fouling and top accuracy
- Devastating terminal performance
- Available in select Barnes VOR-TX® ammunition offerings

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGES 45-46.

### TIPPED TSX

All the features of the TSX Bullet, plus:

- Polymer tip that boosts B.C. and helps initiate rapid expansion
- Re-engineered nose cavity to provide faster expansion and devastating terminal performance
- Popular calibers and weights available in Barnes VOR-TX® ammunition

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGES 44-45.

### LRX

All the features of the TSX and the Tipped TSX Bullets, plus:

- Designed to match the latest advancements in firearms and extended range optics capabilities
- Re-engineered nose cavity to provide a wide range of workability for full expansion and deep penetration on game at close and extended distances
- Doppler radar technology utilized in the development process to optimize the bullet's profile for low drag and top accuracy at extended distance
- Available in select Barnes VOR-TX® LR Ammunition offerings

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 49.

## SOLID ACCURACY, **FROM TIP TO TERMINAL** PERFORMANCE.

### MAGNUM MZ

Delivering 100% copper bullets with higher velocity, flatter trajectory and unmatched accuracy. Its unique, magnum load sabot guides its 250 grain polymer tipped, 50-caliber bullet to the highest levels of muzzleloader precision, with awesome expansion, high weight retention and deep penetration – a trifecta of deer-dropping performance. For use in all 50-caliber muzzleloaders.

- High-tech sabot is specifically engineered to withstand magnum powder charges while, while properly sealing the bore and allowing for exceptional accuracy
- Performs well in modern super-magnum MZ rifles that generate over 35,000 psi chamber pressure
- Bullet delivers reliable expansion and deep penetration at both high and low velocities

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 48.

### EXPANDER MZ

These bullets deliver deadly performance at both high and low velocities. Expand to twice their original diameter, creating six razor-sharp copper petals that slice through game. No fragmentation. These tough, deep-driving bullets typically retain 100 percent of their original weight.

SEE FULL PRODUCT LISTING ON PAGE 48.

### SPIT-FIRE TMZ

The Spit-Fire TMZ shares the same boattail design and 100 percent copper construction with the Spit-Fire MZ but has a streamlined polymer tip for rapid expansion. Higher ballistic coefficient aids exceptional long-range performance.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 48.

### SPIT-FIRE T-EZ

Spit-Fire T-EZ muzzleloader bullets with EZ Load sabots load easier in guns with tight bores. Ramrod pressure required to load and seat these 50 caliber flat base bullets is greatly reduced.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 48.

**BUILT TO  
DEFEND.  
ENGINEERED TO  
PERFORM.**

The most technologically advanced personal defense loads and components on the market today. The result of thousands of rounds of testing, Barnes personal defense products provide maximum energy transfer and straight tracking for solid confidence in any scenario. They're optimized to meet stringent FBI protocol and law enforcement standards, and engineered to penetrate intermediate barriers with minimal deflection, Barnes personal defense loads and bullets deliver consistent, threat-stopping performance you can trust.

# PERSONAL DEFENSE

## AMMUNITION & COMPONENTS

TAC-XPD AMMUNITION

TAC-XP HANDGUN COMPONENTS

DEFENSE BUCKSHOT

## PERSONAL DEFENSE

### BARNES TAC-XPD DEFENSE

The optimized solution for personal and home defense. Engineered to deliver top performance in life-threatening situations. Nickel plated cases and coated, all-copper TAC-XP bullets produce smooth, reliable feeding with virtually no muzzle flash.

The all-copper construction and very large, deep hollow-point cavity expand, penetrate and perform more consistently than any personal defense product on the market.

[SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 43.](#)

PERSONAL DEFENSE OPTIMIZED.  
**WE DIDN'T INVENT PERSONAL DEFENSE AMMUNITION.  
WE PERFECTED IT.**

With a large, deep hollow-point cavity, TAC-XPD ammunition is designed to deliver top performance when it's most critical.

### BARNES TAC-XP PISTOL

Designed for law enforcement and personal defense, 100-percent copper TAC-XP pistol bullets meet the requirements of lead-free practice environments. They maintain their original weight and track straight after being fired through intermediate barriers like car doors, plywood and automobile windshield glass.

[SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 49.](#)

### BARNES DEFENSE BUCKSHOT SHOTSHHELLS

The massive terminal punch and dense consistent patterns you want when the stakes are at their highest. Every round of Barnes Buckshot is produced with the uncompromising precision and reliability we've built our name on, because every load just may be the one lives depend on.

[SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 42.](#)

**PURSUE  
PERFECTION AT  
ITS FARTHEST  
REACHES.**

Created from first quality, factory-fresh brass, temperature-stable propellants and high-ballistic-coefficient projectiles, Barnes match, range and target ammunition is the most consistent commercially manufactured ammunition on the market today. Barnes is a proud supplier of precision ammunition to America's Elite Military marksmen. Precision rifle, 3-gun and high power competitors can expect that same unwavering consistency in their chosen pursuit.

MORE MATCH BURNER INFO @ BARNESBULLETS.COM

## BARNES BALLISTIC COEFFICIENT VALIDATION. MEASURE TWICE, ESTIMATE NEVER.

**Before it makes it to you, every new Barnes bullet must make it through one of the industry's most rigorous testing protocols, followed directly by another; advanced Doppler Radar. No short-distance measuring. No computer estimating. Because the smallest variations in velocity, pressure or time of flight add up to downrange differences we'll never accept, nor ask you to. Our process delivers ultimate precision for our published BC values and, most importantly, downrange.**

Barnes utilizes its 300 yard indoor range to accurately measure and calculate BC values, using three variables: instrumental velocity, time of flight (TOF) and air density. Instrumental velocity and TOF are measured using commercial ballistic testing equipment, accurate within .1%. Air density is determined by carefully measuring the current temperature pressure, and humidity at our indoor range. But Barnes doesn't stop there. Even though this test method ranks among the most accurate in the industry, we confirm all data using another highly accurate measuring technique - Doppler radar.

Doppler radar sends electromagnetic waves at a known frequency toward the bullet in flight. These waves reflect off the bullet, returning to the radar head where a new frequency is recorded. The change in frequency is known as the Doppler effect. From this change, the bullet's velocity and TOF are measured thousands of times,

anywhere from just in front of the muzzle to 1600+ yards downrange. Instead of measuring a single BC value, this system allows us to measure multiple drag coefficient (CD) values for the full velocity range of the flight.

The first step in post analysis to measure the CD values, is to accurately model the bullet using a 6 Degree of Freedom (DOF) software. This program accurately determines the mass properties and estimates the aerodynamic coefficients. This data is then passed into additional sophisticated software, which runs a theoretical flyout in an attempt to match the observed data. The drag curve (CD vs Mach #) is modified until the theoretical matches the observed. When the error has been minimized to a few fps, the drag curve is finalized.

From here, the BC can be calculated for a given Mach #. Barnes compares the BC value between the two test methods to determine the validity of the value. In almost every case, there is a very small error between the values and the BC value is settled upon and finalized. If not, we go back and repeat testing to ensure we're providing the most accurate data possible.

At Barnes, we take great pride in our published BC values. We're committed to providing shooters data they can trust, every time. By double checking and validating data using these two proven methods, you can be confident you're sending your best.

# BARNES AMMUNITION

THE GOLD STANDARD FOR PERFORMANCE  
NOW AVAILABLE IN LEAD CORE.

It's a whole new breed of lead-core ammunition with unprecedented Barnes precision in its DNA, crafted in Utah to master a wide world of applications. Barnes Ammunition is loaded with new jacketed hollow-point lead-core bullets, premium components and the same rigorous standards for shot-to-shot consistency we've built our name on. This all-purpose ammunition is optimized for ultimate confidence on the range, small game and for personal defense. With a host of new chamberings coming soon.

BARNES AMMUNITION.  
MULTI-PURPOSE,  
**ONE HIGH STANDARD  
OF PERFORMANCE.**

## BARNES AMMUNITION - MULTI-PURPOSE

Every round of lead-core Barnes Ammunition is carefully engineered for maximum versatility. This 55-grain jacketed hollow-point bullet delivers impressive terminal results ideal for predators, varmints and range metal, with industry-leading Barnes precision built-in. Constructed with unmatched quality control and premium components for confidence on the range, on game and for personal defense.

AVAILABLE IN 30-06 SPRG 165GR JHP BT  
.223, 243 WIN, 6.5 CREEDMOOR, 270 WIN, 308  
WIN AND 300 BLACKOUT. ADDITIONAL RIFLE AND  
HANDGUN CALIBERS COMING SOON.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 42.

## HIGH-VOLUME, HIGHLY ACCURATE, STEEL-FRIENDLY.

### BARNES MUTI-PUPPOSE GREEN

Originally developed for military and law enforcement applications, Barnes Multi-Purpose Green is a non-toxic bullet featuring a highly frangible, powdered-metal copper-tin core inside a gilding metal jacket. Unlike frangible bullets without a protective jacket, MPG bullets remain intact under the rigors of handling, feeding and firing in high-capacity magazines. This eliminates the primary cause of jammed actions and plugged barrels often experienced when firing frangible ammunition in modern MSRs.

Ideal for practice using steel targets and for close-quarters training, Barnes MPG bullets shatter on contact with steel plates and other hard cover targets with virtually no chance of ricochet. So you can shoot more and elevate your marksmanship, without ripping through steel targets.

## PULL THE PIN ON EXPLOSIVE TERMINAL PERFORMANCE.

### VARMINT GRENADE

Since 2007, Barnes Varmint Grenade has delivered explosive terminal performance on contact with ground hogs, gophers, red fox, bobcats, coyotes and more. Featuring a frangible copper-tin powdered metal core surrounded by a gilding metal jacket for instant fragmentation, these bullets expend energy quickly and rarely exit large predators, while leaving valuable pelts virtually intact.

## PINPOINT PRECISION, VARMINT VAPORIZING RESULTS.

### VARMIN-A-TOR

Barnes Varmin-a-tor hollow-point bullets feature a Deton-a-tor® lead core, scored nose cavity and thin tapered jacket that fragments violently on impact. This lethal combination doesn't just stop varmints in their tracks, it vaporizes them. For a reliable varmint bullet that's highly effective, highly accurate and highly explosive, Varmin-a-tor is a fantastic choice.

FROM THE FACTORY TO THE FIELD,  
BARNES EMPLOYEES USE WHAT THEY BUILD:  
**THE MOST ACCURATE,  
MOST EFFECTIVE HUNTING  
BULLETS ON EARTH.**

FROM UTAH TO THE FIELDS &  
WOODS OF EUROPE WITH  
**UNMATCHED PRECISION AND  
TERMINAL PERFORMANCE.**

Barnes VOR-TX® EURO delivers hand-loaded precision in a factory round super-engineered to stop European game in its tracks.

#### VOR-TX® EURO:

VOR-TX® EURO is precision loaded with the venerable Barnes all-copper, lead-free bullets and conforms to CIP pressure standards. This ensures safe operation and maximum ballistic potential, while offering European hunters the accuracy and terminal performance that surpasses lead-core bullets on both thin-skinned and heavy game.

SEE FULL PRODUCT AND COMPONENTS LISTING ON PAGE 43.

*NOTE: VOR-TX® EURO products are not available for sale in North America.*
